OP GRAND

Subject: What is the "green machine" costing this city and can we as a

EXHIBIT No. 1190  
.....  
..... CLERK

Dear John.

Firstly, I met with Brian today for lunch and gave him my assurance of support. I hope that I did not give him cause for concern, you know how blunt I can be at times.

Attached is the article on GECKO I have discussed with you, there are some significant changes, some are due to the contribution of Planning and Environment Court solicitor Michael Marshall who is the legal representative for C.S.F. Michael wrote from the second last paragraph on page 2 to the second paragraph on page 3. I have included this material with his permission and deleted some other material to make the article fit within the space available. This story has also been sent to John Witheriff of Minter Ellison for approval in relation to any possibility of defamation. As you will appreciate until John signs off on it, the story is for your eyes only. What I require from you is your approval for its publication as the Western Chambers are mentioned.

Regards,  
Bob

Post Script: Sorry I have been unable to call you as I promised but this article, ecotourism forum, Rainforest Interpretive Centre, Celebrate Nerang and least of all work has had me going 20 hours a day.
