

Submission 12 - An angry fed up citizen with no convictions or charges

Hi pathetic commission who sends 90% of corruption complaints back to police to investigate and save their own asses. The legislation should stay the way it is for freedom of information. If you hide corruption you will only make the victims which are in the 1000s now fight back and cause harm and death to police officers who are acting unlawfully and illegally. We all know the ccc or the ex cmc doesn't give a shit about police corruption cause you're just as corrupt as the police including the government who refuses to answer why police are allowed to assault innocent people over being video recorded or just because they're in the wrong place at the wrong time. I once wanted to become a police officer in Queensland but ever since its all about revenue raising and corruption and the amount of abuse I've copped from off duty officers and on duty officers I don't think I want to join to cause harm to any human being who is living within the laws. You put a gag notice on any further corruption prepare for mayhem cause I will feel sorry for the good officers I know and have worked with who could die or be seriously injured on a count of you guys not doing your job and allowing the select corrupt qps officers to do whatever they want and to investigate themselves. I'm ashamed of how bad the service is and am glad I didn't join qps cause I don't want to be working with criminals I hate criminals, can't stand people who deal or use drugs I can't stand people who want to fight or steal other people's items and I really hate how there is no one who can protect the citizens from abusive officers who act illegally and from the criminals who end up being let go by the police only to steal and kill again. So don't change the legislation to silence anyone cause if you do, you will have police officers and civilian blood on all of your useless commissions hands. You bloody grubby corrupt government department.
