

YO Well, first of all, I think best education for the public.

YO Because knowledge is power so if they knew when they see something unusual, that's good education for the public. And also, I thought right to know. I don't know why cannot be public. That's all.

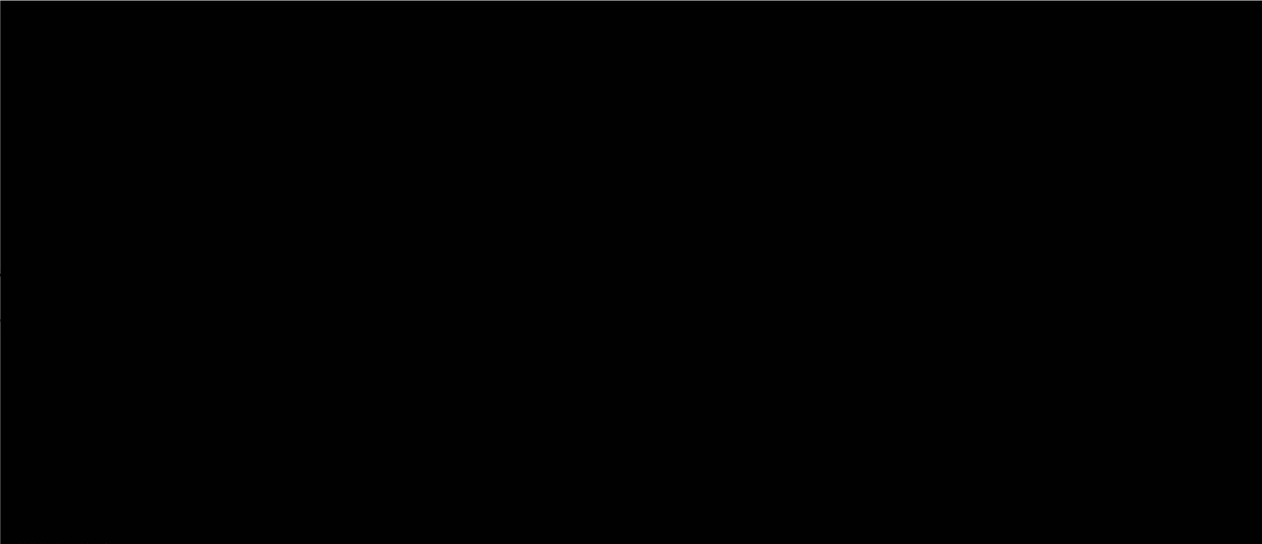

YO So I don't know anything about the duties or those things. To make public I thought that the best education you can do for public.

YO Yeah, so therefore open to the public on point.

YO Well, um, terrible things happening these days but the public, they don't know. I didn't know that but if they have knowledge, when something happens, they will stand back and think twice.

YO           And if people have knowledge, what happen in the past, well that's great education for the public.
